Our Services

CORE OFFERINGS

01

Digital Product Engineering

We engineer robust digital products that drive growth, ensure reliability, and scale for lasting business value.

02

Artificial Intelligence Development

We build intelligent AI solutions that drive automation, insights, and smarter decision-making.

03

Custom Software Development

We craft scalable, tailor-made software to match your unique business needs.

04

Web Application Development

We deliver robust, high-performance web apps with seamless user experiences.

05

Mobile Application Development

We design powerful mobile apps tailored for iOS and Android platforms.

06

ERP Development

We engineer robust, enterprise-grade ERP solutions tailored to streamline complex business operations.

07

MVP & SAAS Development

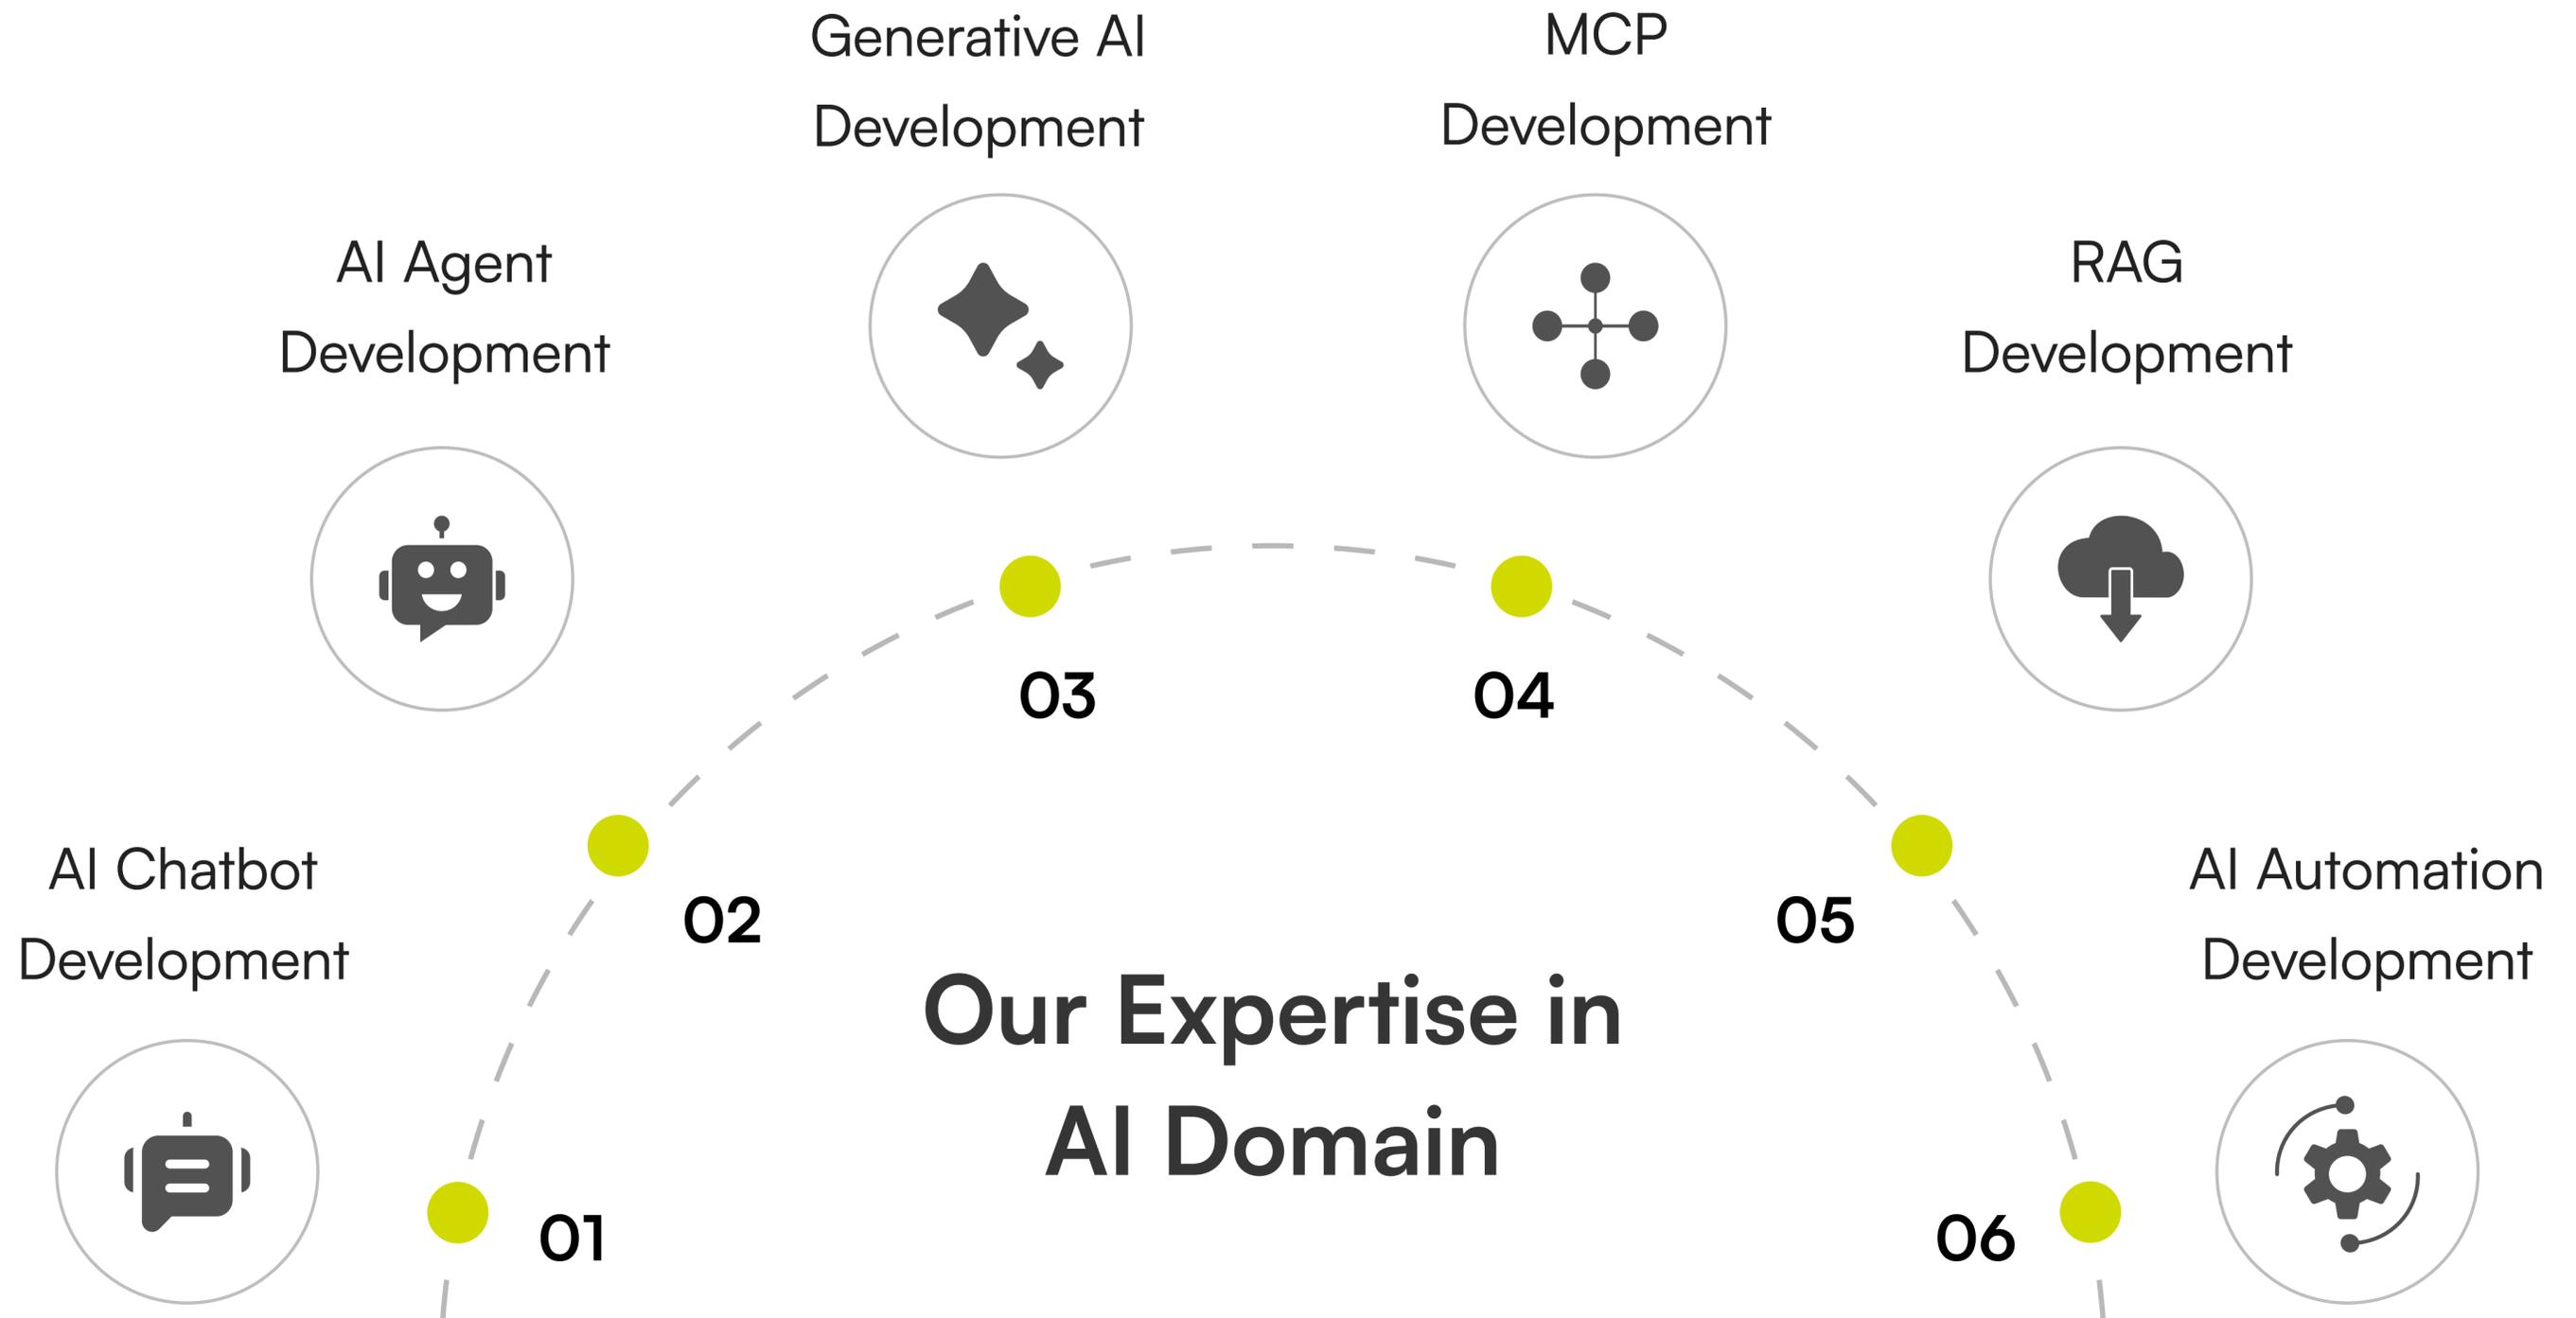

We build MVPs and high-performance SaaS platforms designed to scale with your enterprise vision

08

Project Management Consultancy

We provide expert project management to ensure timely delivery, cost control, and smooth project execution.

What We Do in **Artificial Intelligence**

Industries We Serve

We deliver custom solutions across Various industry sectors—serving many business verticals. Few of them are:

Ecommerce

- Point of Sale (POS)
- Order & Fulfillment Management
- Product & Inventory Management
- Vendor & Supplier Management
- Marketing & Automation

Education

- Learning Management System
- Student Information System
- Examination & Assessment Systems
- Career Counseling & Skill Building
- Fees & Finance Management

Healthcare

- Electronic Medical/Health Records
- Hospital Management System
- Telemedicine & Virtual Care Platform
- Appointment & Queue Management
- Pharmacy & Medication Management

Real Estate

- Property Management Systems
- Tenant & Lease Management
- Online Booking & Payment Portals
- Facility & Maintenance Management
- Real Estate ERP Solutions

Finance

- Digital Banking Solutions
- Lending & Credit Platforms
- Payments & Wallet Solutions
- Investment & WealthTech
- Bill Payments & Recharge Systems

Other Industries

- Manufacturing Solutions
- HR Tech Solutions
- MarTech Solutions
- Logistics & Supply Chain Solutions
- Travel & Hospitality Solutions

AI-Powered Marketing Automation Platform [↗](#)

Industry: Marketing

Technologies: N8N Python

Country: USA

Reactjs GPT Salesforce

Problem: Marketing teams struggled with inefficient campaign management, manual segmentation, and limited insights, leading to wasted resources and lower ROI.

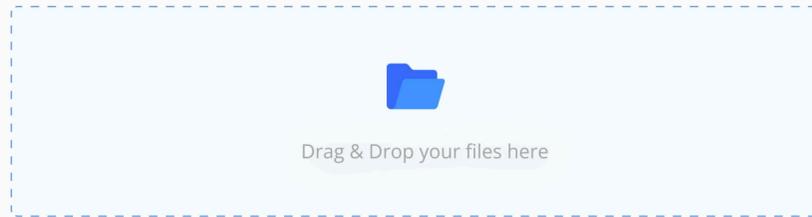

Solution: To help the client overcome marketing inefficiencies, we built an AI-driven automation platform that unified R&D, segmentation, content creation, outreach, and performance tracking in a single dashboard. It automated complex workflows, reduced manual effort by **70%**, cut marketing costs by **35%**, and shortened campaign launch times by **40%**, accelerating their go-to-market strategy and overall marketing transformation.

Smart AI Invoice Processing System

Industry: Logistics

Country: Singapore 

Technologies: [Python](#) [LangGraph](#) [crewai](#) [Azure](#) [Streamlit](#)

Problem: The client struggled with slow, error-prone manual invoice processing due to varied formats, low-quality scans, and multiple languages.

Solution: To help the client automate invoice processing and boost accuracy we implemented an AI-powered solution using OCR, ML, and NLP. It handled diverse formats, improved low-quality scans, supported multiple languages, and integrated with ERP systems for seamless data flow. This led to a 90% reduction in manual effort, 99% accuracy, 30% cost savings, and 95% faster processing of thousands of invoices.

Healthcare Management System

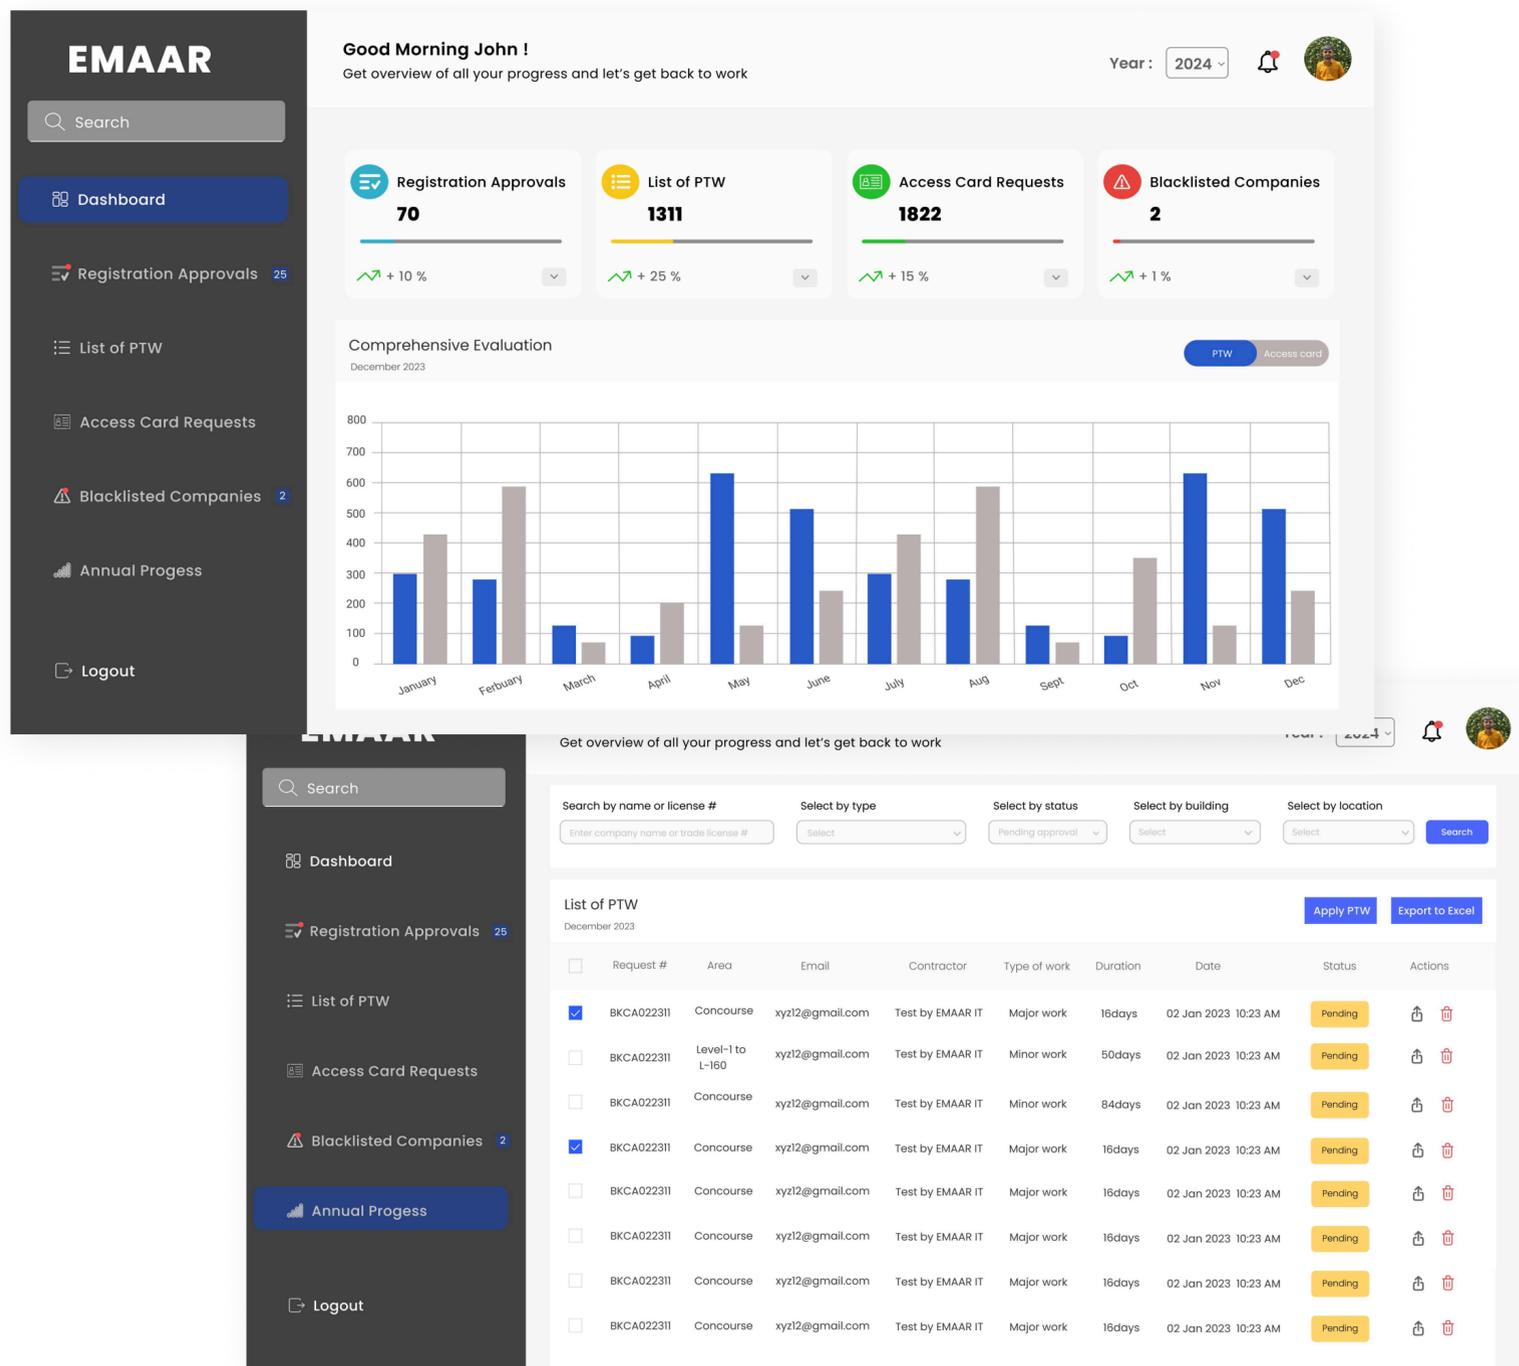

Industry: Healthcare

Country: India 

Technologies: Nextjs TurboRepo Nestjs Nginx Azure Docker

Problem: The client faced delays due to disconnected systems, manual lab coordination, and outdated infrastructure blocking scalability.

Solution: To modernize the client's healthcare infrastructure, we developed a Healthcare management system integrated platform unifying appointments, labs, and prescriptions. This enabled efficient multi-stakeholder collaboration, accelerated patient onboarding by **65%**, cut lab-report turnaround by **50%**, and scaled the user base from **35.5 to 70 million**, delivering a scalable, future-ready solution.

Vendor Management System

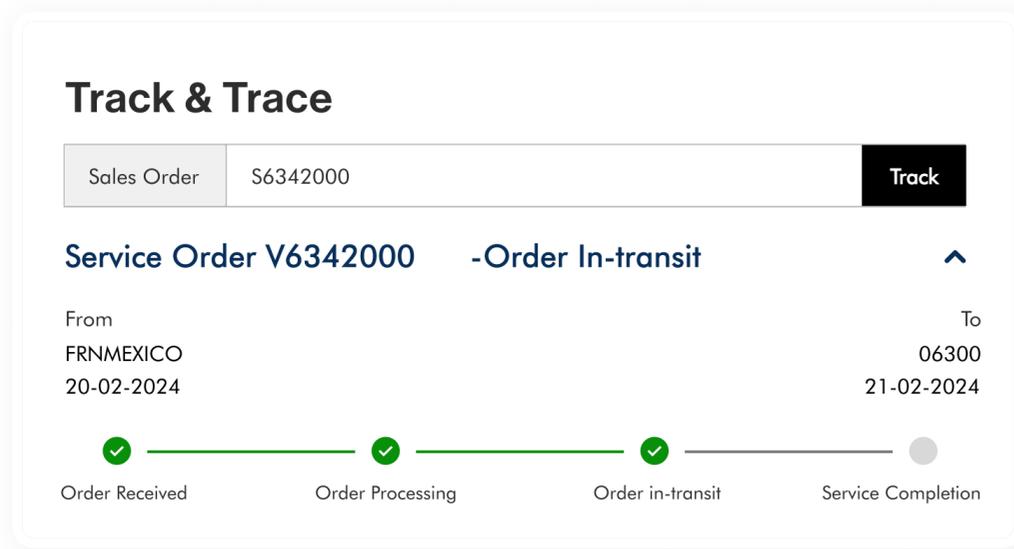

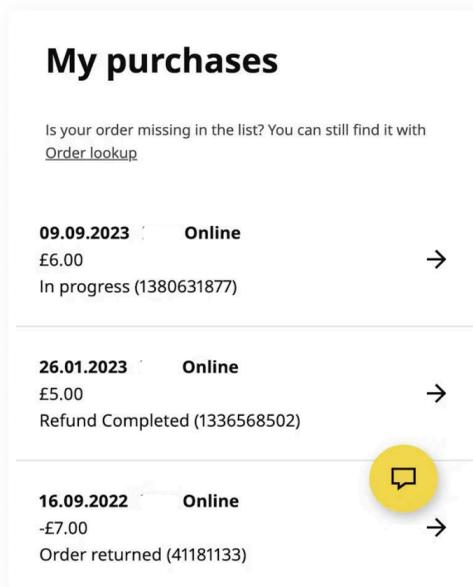

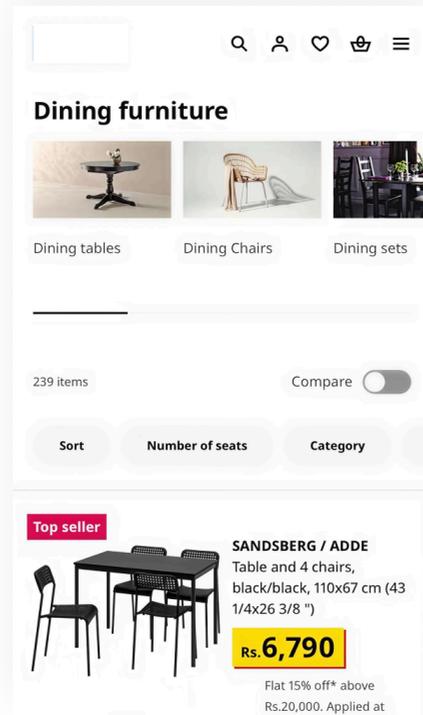

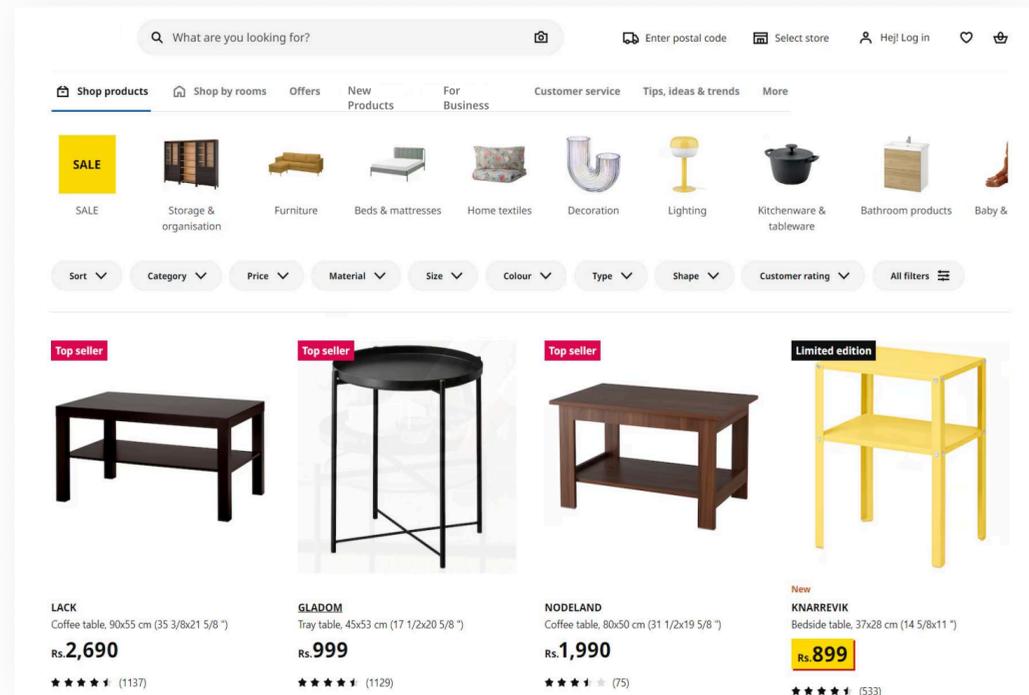

Industry: Prop-Tech

Country: UAE

Technologies: Reactjs Nodejs Expressjs MySQL MongoDB

Problem: Manual, paper-based workflows caused documentation delays, frequent errors, and limited visibility across departments and contractors.

Solution: To optimize the client's workforce and site management processes, we implemented a centralized Vendor Management System that digitized employee onboarding, permit tracking, and access control. The solution streamlined **interdepartmental coordination** through unified workflows and led to improved operational accuracy and significant **cost reduction** through end-to-end automation.

Self-Order Management System [↗](#)

Industry: Ecommerce

Country: Netherlands 

Technologies: Reactjs Nodejs Spring boot Firestore Expressjs

Problem: Limited post-purchase self-service features caused inconvenience and inconsistent experiences across regions.

Solution: To improve the client's post-purchase journey, we built a global self-service platform with features like order tracking, rescheduling, and purchase history. This led to a 60% drop in support queries, a 45% boost in user satisfaction, and a 35% increase in repeat orders. Region-specific configurations and automation reduced manual intervention by 55%, enhancing operations across markets.

Our **Software** Development Process

From Discovery to Delivery: Our Structured 7-Step Framework

Ensures Strategic Alignment, Agile Execution, and Long-Term Success

Our **Engagement** Models

Software Outsourcing

We use the Outsourcing Development model to leverage external experts for managing software projects, enabling clients to focus on core activities while ensuring quality results.

Dedicated Team Model

Under the Dedicated Team Model, clients can hire one or more full-time resources with expertise in various technologies to meet their specific needs.

Team Augmentation Model

Under the Team Augmentation Model, we provide on-demand expertise and additional resources to enhance your existing IT team, processes, and workflows.

Our Clientele

We proudly serve a diverse clientele across various industries and regions worldwide.

Thank You !!
